

## Quality Control Inspector

<https://assessment.predictiveindex.com/bo/PBT/QualityControlInspector#page00>Our business keeps growing, and so does the work around meeting (we prefer to exceed) our customers' expectations, delivering outstanding service, and keeping our employees safe. We have a new role for a Quality Control Inspector to support the critical work of our Quality Management team.

If you were the kid whose favorite question was, "Why?" and never ascribed to the philosophy of "That's good enough." when mowing the lawn or cleaning your room, and you actually enjoyed finding mistakes because you liked fixing them even more, this role could be your next great career move.

As part of our Quality Systems and Product Support group, within our larger Operations and Engineering division, what you do in a day has an impact on every other department. You make sure what our vendors supply and what our Production team builds meets our stringent quality standards.

A day in the life of our Quality Control Inspector varies from reviewing specs to receiving inventory to rectifying issues identified through our non conformance reports. You're pretty versatile and adept in switching from labelling and receiving products, to identifying and investigating and resolving root causes of errors.

You'll use all kinds of tools and equipment in your work, from computers and handheld scanners to power tools and even forklifts.

If you've completed grade 12 (or equivalent); have formal training; worked in a manufacturing and fabrication shop, ideally, are on your way, or have achieved the Certified Quality Inspector (CQI) designation, we'd like to hear from you. We need a true team player: someone who will never utter, "That's not my job." and instead, wonders, "How can I help make this better?"- constantly seeking solutions, efficiencies and improvements. Your curiosity, ability to communicate, unwavering integrity and ability to remain objective when assessing data and information will serve you well in this role.

We want to get to know you better—what motivates you, your communication style, how you make decisions—so ask all applicants to complete this short assessment by following this [link](#) to the Predictive Index. We promise: The Predictive Index is not an aptitude test, and there are no right or wrong answers.
