

Stainless Polisher

Our Production team is growing, and we need to add another safety-oriented, collaborative, and mechanically-inclined person to our small, but mighty team of Stainless Polishers.

You put the finishing touches on the stainless steel products that are assembled and installed to create the play spaces that allow kids to be kids. You truly are having an impact in connecting communities through social experiences.

As part of our Operations Division, you'll join a Production team of fabricators, welders, and machinists, a fun group of pros with experience as diverse as their musical tastes (and senses of humour).

Our Polishers shift between reading and interpreting fabrication drawings and operating power tools and heavy equipment, even overhead cranes. You might also be the final step in testing to make sure our welded assemblies meet our quality control standards and reflect the craftsmanship we're so proud of.

If you've completed grade 12 (or equivalent), worked in a manufacturing and fabrication shop, ideally with aluminum and stainless steel alloys, and know your way around power tools that cut, grind and drill, we'd like to hear from you.

We want to get to know you better—what motivates you, your communication style, how you make decisions—so ask all applicants to complete this short assessment by following this [link](#) to the Predictive Index. We promise: The Predictive Index is not an aptitude test, and there are no right or wrong answers.

Please apply to careers@waterplay.com with **"Polisher"** in the subject line or via mail, no later than May 21, 2021 to:
