

Accountant – 18 month term position

Our Finance and Administration Team is not your typical group of accountants. Reporting to our VP who is keen to support your career growth, you'll be joining a diverse group with international experience, broad organizational knowledge, and great senses of humour. Sometimes they even bring their dogs to work.

In the past 12 months, our organization has undergone considerable changes, with five separate entities coming together as one group of companies. We've consolidated and centralized finance and accounting activities and need you to continue the momentum of your predecessor's accomplishments in invoicing, accounts payable, reconciliations, reporting and forecasting. Adding to the complexity of our business is that we operate in Canada and the US (with employees in both countries) and manufacture the products we sell through a dealer network and sell third party products too.

We've got ambitious plans for 2022, and our Finance team will be shifting from a revenue to gross margin focus and conducting cycle counts rather than annual counts. Your role is essential in supporting, and even leading, some activities and projects that ensure we deliver in these areas. We'll rely on your experience and skills in monthly forecasting and completing the full month end process (invoicing, reconciliation, payments), compiling and analyzing GM reports and attacking inventory analysis activities, all focused on driving improvements and enhancing efficiency.

If you've got post secondary education in accounting, and you've attained your CPA designation or are working towards it, and have experience in a manufacturing environment, we'd like to hear from you.

We want to get to know you better—what motivates you, your communication style, how you make decisions—so ask all applicants to complete this short assessment by following this [link](#) to the Predictive Index. We promise: The Predictive Index is not an aptitude test, and there are no right or wrong answers.
