

Project Drafter

How does kicking off your career with a growing, global business sound? Being welcomed into a supportive team of digital artists, landscape architects and 3D designers? Contributing to bringing fun and laughter to kids all over the world? We're not exaggerating. We're in the business of play and have a lot of fun delivering to our customers.

We're adding a Project Drafter to our Visualization (Viz) Team. That's the team who translate our customers' dreams into compelling designs and realistic renders before our engineering group takes over to create the technical specifications our production team uses to build the actual park features. So, yes, you're a critical contributor to bring concepts to life as playground installations that create community across the globe.

Your role is to collaborate with our sales team to draft functional AutoCad plans and create schematic designs that align with our clients' vision, convey our unique design philosophy and meet construction and safety standards. That might mean you're calling dealers to confirm a design element, consulting our technical experts about product specifications, or scrutinizing elevation plans and schematics to confirm feature placement on a splashpad. With your strong comprehension of technical drawings (construction, fabrication, installation), and ability to convey information for audiences with varying levels of technical backgrounds, you can build technical manuals and supporting documentation for our diverse product lines.

Your world is project-focused, and deadline driven. If you're able to be detail-oriented and methodical while maintaining accuracy at a fast pace, you'll likely thrive here. If you have technical post-secondary education (mechanical or civil engineering or drafting), talent in 2D AutoCAD programs (Revit is a bonus), outstanding communication and customer service skills, and a great sense of humor, we'd like to hear from you.

We want to get to know you better—what motivates you, your communication style, how you make decisions—so ask all applicants to complete this short assessment by following this [link](#) to the Predictive Index. We promise: The Predictive Index is not an aptitude test, and there are no right or wrong answers.
