WATER TREATMENT SYSTEM

0010-3966 | LIQUID CHEMICAL 300 GPM

PRODUCT LINE Water Management

CATEGORY Water Treatment Systems

HIGHLIGHTS

Waterplay's industry-leading recirculation system functions as a closed water management unit that continually recycles treated water to and from the play space.

- Designed and manufactured for high efficiency water recirculation
- Provides 100% filtration and disinfection
- Uses advanced water treatment technologies with consideration to power consumption and environmental factors
- Intelligent automation reduces operational burden
- Uses leading disinfection methods
- Small footprint adapts easily to space requirements
- Pre-engineered, factory built and tested

UV WATER PURIFICATION SYSTEM

ADD-ON: Take water purification to the next level by adding UV to your water treatment system.

EFFECTIVE

UV water purification destroys 99.9% of microorganisms.

RELIABLE

More effective against viruses than chlorine and chloramines.

SUSTAINABLE

Low energy requirements.

Upgrade anytime, Waterplay's UV water purification add-on is post-installation compatible. (0003-3506)
