

## CAD DESIGNER – TSR CO-OP POSITION

---

At Waterplay, we're in the business of play, and we're in the business of making it possible for everyone to play. That is our reason for being, and every Waterplayer takes pride in knowing what we do makes kids smile.

What makes you different, and makes us different, is a passion to create. A passion to create playful experiences accessible for everyone. At Waterplay, you'll truly be making a difference for your community, with visible and lasting impact for future generations who enjoy our aquatic play pads, playgrounds and streetscapes.

Our Technical Service Reps (TSRs) are the critical link between our clients' dreams and our engineers' reality, designing to unleash the exhilarating potential of aquatic play while balancing pragmatic details of design, safety, and code compliance.

In the TSR Co-op position of CAD Designer, your role would be the ultimate support role – main tasks would include creating AutoCAD drawings, building technical manuals, and planning out aquatic play spaces along with piping and electrical components. You will quickly establish relationships across our entire organization and just as quickly, establish a reputation externally as being helpful, reliable, and fun to work with.

If you are enrolled in an engineering program and looking for co-op experience, have formal training in AutoCAD or other drafting/modelling software, and want to put your skills to use in a fun environment that encourages PLAY, we think you'd like it here. If your weekends are spent assembling the transmission for the car you're rebuilding, or even assembling IKEA furniture without uttering a single 4-letter word, we definitely want to hear from you (because you're logical, patient and have good spatial skills).

Interested? Please apply to [careers@waterplay.com](mailto:careers@waterplay.com) with "TSR COOP" in the subject line or via mail, no later than May 21, 2021 to:
