

- interactive
- sensory stimulation
- team play

Dance, jump, stomp or stand! The \*Tappin'Tunes is an interactive play feature combining water fun with musical notes. Waterplayers love that they control the sound as they cover one or more of the seven ground sprays on the piano keys below. Stomp out one of your favourites, or create a new tune with several friends, the Tappin' Tunes is favourite with both waterplayers and spectators alike.

\*This feature must be used in conjunction with the Maestro Activator.
